

ICE Trice S - Sports Trike w. Carbon Fiber Seat

Sport performance touring trike

The Trice S is built for maximum speed. Low and laid back, the S minimizes air resistance while giving you a hard, solid seat to push against.

The following excerpted from the ICE website:

The Trice S is a great fast touring trike from ICE. Its frame is based on the championship winning Trice XXL, the most popular ultra fast trike in the Trice Stable. The Trice S is a low, laid back, ultra fast machine. It is as at home on the race track as it is on a long tour or an ultra-endurance Audax event. Some people say that this is not an easy machine to get on or off. In our experience, once people have sampled the S's delights on the road, they don't want to get off!

S stands for Sport and this trike will appeal to those out for a bit of a blast. Indeed you could say that's what it was designed for. This machine carves its way through corners with the confidence of a thoroughbred. Its hard shell seat holds you firmly in place so that you can concentrate on keeping the pedals turning. ICE are fitting a European made seat to the Trice S as standard; it is not the same carbon-fibre seat made by ICE for the Trice custom range, but it is very comfortable and it has proven itself to us in testing. To maximise the aerodynamic advantage of recumbents you need to lie back. This is what the hard shell seat allows you to do. If you want to go very fast you need a solid platform for efficient power production and you cannot beat a hard shell seat for that. The body-hugging shape can be further personalised if necessary with the set of pads supplied with each machine.

A performance trike of this standard combined with the low price is previously unheard of. If it's all out performance you are looking for, then you won't shy away from the bright orange sparkle paint job. People will notice you as you fly by.

The Trice S now gives you a very smooth ride thanks to the tunable rear suspension. When you are not riding, the Trice S can be separated and folded down to a convenient size for easy & secure transportation and storage.

- Tunable rear suspension
- Separates and folds tool-lessly.
- The seat is adjustable for recline angle.
- 20" wheels all round
- Great looking Orange sparkle powder coat finish.

Price includes a Rear Mudguard (fender), a mirror, a flag, and a full set of chain tubes to keep the oil on the chain and off of you.

A great range of accessories are also available from ICE for the Trice S, so you can select from the list of extras to enhance your machine.

The Trice S is only recommended for riders up to 18st (252lbs, 115Kg).

Price : \$2,595.00
