

TerraCycle ICE / Trice Idler Pulley Kit

Trice Dual Idler Kit

Improve the efficiency of your Trice Q, Trice T, or Trice S standard model recumbent trike by replacing the standard idler pulley and chainguides with these ultra-efficient long-wearing chainguide pulleys.

The ICE idler jockey-wheel-kit replaces the idler wheel and the return chain guide allowing you to get rid of friction associated with the chain-tubes.

The ultimate kit for the ICE trikes. This allows you to dispense with most or all of your chain tubes and optimize the drive train for the least friction and the highest performance.

Composed of side by side TerraCycle idlers. The power idler comes with Titanium cog and a Longlife TerraCycle Return Idler with industrial urethane bed. Both idlers will carry the chains under/under and are protected by a beautiful custom aluminum chain keeper. All High quality bolts, spacers, and nuts required are included in the kit for easy installation.

This kit comes with the Ti cog for long-wearing life.

Price : \$160.00
